Top NZ paint company challenges Whitireia students to create colourful commercial

Few students have the chance to create a broadcast television commercial, but this year's intake to the New Zealand Diploma in Screen Production (Level 6) will have exactly that.

Whitireia Community Polytechnic Limited is partnering with leading New Zealand paint company, Resene, on an in-house film competition that challenges screen production students to create a 30-second TVC, inspired by colours of their choice from Resene 'The Range', Resene's new fashion paint colour range.

The challenge asks students to generate a unique concept for a commercial and pitch it to Resene. Once concepts are finalised, students will then work in teams to generate a TVC from-scratch using paint resources provided by Resene. The challenge gives students the opportunity to gain industry experience with a real-life client and extend their technical and creative skills.

A panel of judges from Resene will pick a winning commercial, which will play on yet-to-be-determined media and promoted on social media. The winning commercial will receive \$2000, while the runner up will receive \$1000.

The initial idea for the project sparked when a budding filmmaker posted a clip online based around Resene's paint colours. A company representative then approached the Whitireia screen production programme.

Tutor David Brechin-Smith said that this is the first time the film programme has worked with an external company in this way.

"To partner with a company with such a well-known and respected brand as Resene is exciting, and we feel privileged to work with them. To make an ad for Resene, with the chance of it to be shown nationally, is a strong incentive for the students. It's a great addition to the programme."

"This project will ramp up their experience in a number of technical crew roles, including leading a shoot," said tutor Corey Le Vaillant.

"Each student also learns how to respond a client brief, working out their concept, and then planning and executing the shoot. It will be a big learning curve, which will require good planning in all stages of production."

The students will have total creative freedom, as long as the commercial meets the client brief and uses paint colours from Resene 'The Range' fashion collection.

"We want them to use skills they will have learned up to that point, exploring depth of field and focus, texture, form, pattern and layers, with moving or static shots, and from the panoramic to the microscopic," said Mr Brechin-Smith.

The challenge will use the Arri Alexa Classic camera, a high-definition digital film camera used by professionals. "With that camera, they will be able to make some beautiful images," said Mr Le Vaillant.

Mr Brechin-Smith said working with Resene will give the Level 6 students experience of a different aspect of New Zealand's screen industry.

"There's work available making commercials, so this gives our students another string to their bow. A lot of people come to the course wanting to work in film, because the world of commercials isn't as visible to most students. This challenge will open their eyes to new possibilities."

New Zealand Diploma in Screen Production (Level 5)

📖	Level 5
🕒	1 year, full-time
💰	\$9,750 (indicative for 2025 intake)
🌐	NZ \$26,000 (indicative for 2025 intake)

Career Options

- Director, Director of Photography (DOP)
- 1st AD (Assistant Director)
- Production Manager
- Camera Operator (ARRI)
- Editor (Avid)
- Props, Gaffer, Grip, Sound, Continuity
- Assistants
- Digital Content Creator

This hands-on programme introduces ākonga to industry-based practices and processes. Learn from industry practitioners and gain skills in off-set and on-set crew roles, including directing, camera, lighting, and production management. Study at Te Kāhui Auaha, our creative campus at the heart of Wellington CBD.

Programme outline

Areas covered in this programme includes:

- Contextual 'building blocks' of film. The history, its arc and role in popular culture, and the components that make for compelling and memorable films.
- The 'toolbox' of filmmaking. Camera, lights, sound, and editing. Project based learning is practical and includes 'in-camera edit shoots, music video production and much more,
- The art of successful scriptwriting as it applies to the film industry. What makes a successful story and how to break this down to a screen ready plan.
- Robust pre-production planning using mapping and recording techniques.
- Discovering the process of editing and how to apply practical knowledge with creative flair to stamp personal marks upon shot. sequences.
- Planning, shooting and editing of a short drama and End of Year (EOY) project.

Entry requirements

NCEA Level 2 or equivalent skills and knowledge and evidence of aptitude based on interview.

International students

IELTS 5.5 (no band lower than 5), or equivalent
